

Likorall 242 ES

Likorall 242 ES with new electronics, prepared for IR-control and rail switch control.

Likorall 242 ES

A unique safety system

- A. Mechanical emergency lowering (not with R2R). A reliable safety feature if the motor stops for any reason.
- B. Battery "back-up" for emergency lowering if electricity is interrupted.
- C. Emergency stop button.
- D. Safety catches on the sling bar prevent slings from accidentally unhooking.
- E. Safety drum with speed control and mechanical stops for control of (highest/lowest) lifting span.
- F. SSP, Safety squeeze protection.

Room-to-room

Likorall 242 ES R2R makes it possible to move users between rail systems in two rooms that do not have interconnecting rails, without cutting an opening above the door.

Building Heights

The diagram shows the different measurements (building heights) in a complete Likorall rail installation. Some of the numbers depend on type of installation.

Battery charging

To recharge Liko's batteries, simply plug the hand-control into the wall-mounted battery charger which is also approved for use in bathrooms. A fully charged battery operates Likorall for approximately 50 lifts.
